Let $m, n \geq 2$. Then $N_S(m \times n) \geq \min\{N(m), N(n)\}$.

Example

$$N_S(3 \times 4) \geq \min \{N(3), N(4)\} = \min \{2, 3\} = 2.$$

Let $A^{(i)}$ and $B^{(i)}$ for $i \in \{1, 2\}$ be two MOLS of order 3 and 4.

$$A^{(1)} = \begin{array}{|c|c|c|} \hline 0 & 1 & 2 \\ \hline 1 & 2 & 0 \\ \hline 2 & 0 & 1 \\ \hline \end{array}, A^{(2)} = \begin{array}{|c|c|c|} \hline 0 & 1 & 2 \\ \hline 2 & 0 & 1 \\ \hline 1 & 2 & 0 \\ \hline \end{array}$$

$$B^{(1)} = \begin{array}{|c|c|c|c|} \hline 0 & 1 & 2 & 3 \\ \hline 3 & 2 & 1 & 0 \\ \hline 1 & 0 & 3 & 2 \\ \hline 2 & 3 & 0 & 1 \\ \hline \end{array}, B^{(2)} = \begin{array}{|c|c|c|c|} \hline 0 & 1 & 2 & 3 \\ \hline 2 & 3 & 0 & 1 \\ \hline 3 & 2 & 1 & 0 \\ \hline 1 & 0 & 3 & 2 \\ \hline \end{array}$$

Example

$$N_S(3 \times 4) \geq \min \{N(3), N(4)\} = \min \{2, 3\} = 2.$$

Let $A^{(i)}$ and $B^{(i)}$ for $i \in \{1, 2\}$ be two MOLS of order 3 and 4.

OPTIMAL DISCRETE STRUCTURES AND ALGORITHMS

ODSA 2010

September 13 – 15, 2010
University of Rostock, Germany

About ODSA

The ODSA 2010 conference, to be held at the University of Rostock, continues the ODSA series following previous conferences in 1997, 2000 and 2005. The conference aims to bring together researchers between several aspects of Discrete Mathematics, Mathematical Optimization, Theoretical Computer Science, and their applications. In particular, the scope of the conference includes combinatorial optimization and algorithms on discrete structures, extremal problems in posets, design theory, coding theory, and graph theory.
