Abstract

Hamiltonian Cycles in Directed Toeplitz Graphs

Dr Shabnam Malik

Faculty of Mathematics, Forman Christian College University, Lahore Pakistan

An $(n \times n)$ matrix $A = (a_{ij})$ is called a Toeplitz matrix if it has constant values along all diagonals parallel to the main diagonal. A directed Toeplitz graph is a digraph with Toeplitz adjacency matrix. In this talk I will discuss conditions for the existence of hamiltonian cycles in directed Toeplitz graphs.
